

Ian Odundo

Full-Stack Developer | UI/UX Engineer

Full-stack developer with 6+ years building cross-platform web, mobile, and USSD applications across fintech, e-commerce, and global health technology. Currently designing and shipping UI/UX for global health information systems used across multiple countries at AIDS Healthcare Foundation. Comfortable across the stack, from database design to responsive front-end interfaces, with a strong foundation in user-centered design and cross-functional collaboration.

EDUCATION

BSc in Informatics and Computer Science

Strathmore University

07/2017 – 09/2021 — 2nd Class Honours (Upper Division)

WORK EXPERIENCE

Global Applications Developer – UI/UX

06/2024 – Present

AIDS Healthcare Foundation – Global HMIS, Nairobi, Kenya

- Design and build user interfaces for AHF’s global web and mobile applications, used across multiple countries and bureaus, with a focus on usability and visual consistency.
- Translate requirements from Global HMIS Managers and country teams into wireframes, prototypes, and detailed design specs.
- Partner with backend developers to integrate UI/UX designs into the codebase, maintaining design-system consistency across products.
- Implement responsive, multi-language interfaces and interactive HTML5 components to support a multi-country, multi-bureau user base.
- Design and modify database objects to support new web/mobile features and build data visualization tools for offline and online use.
- Integrate AI-assisted features into AHF’s global applications to support data triage and reporting workflows.

Tech: JavaScript, React/Angular, HTML5/CSS3, .NET/C#, AI/LLM APIs, Figma, Adobe XD

Software Engineer

11/2022 – 11/2023

Prevoir Solutions Informatiques (4C Group)
